Intelligent Window Shutters

protect
WINDOW SHUTTERS

Protect Window Shutters are the modern,

effective and affordable way to give your home the lifestyle and comfort you want and the security and privacy you need.

**MAKE LIVING
in your home:**

- ✓ MORE SECURE
- ✓ COOLER IN SUMMER
- ✓ WARMER IN WINTER
- ✓ QUIETER
- ✓ MORE PRIVATE

Imagine experiencing cooler summers and warmer winters.

Add the benefits of year-round protection against intruders, noise, wind, plus damaging UV rays, and there's no wonder why many Australians have installed tailor-made Protect Window Shutters.

Protect Window Shutters are manufactured to the highest standards in Australia and are tailor made to suit your individual needs, making them possible to fit almost any door or window.

Protect Window Shutters protect your privacy and secure your home from intruders. The amount of light and ventilation can be controlled by adjusting the distance between the slats, creating a pleasant, softly lit atmosphere.

Annoying outside noises are reduced and when your shutters are open they are out of sight. Protect Window Shutters are made from interlocking, architectural strength aluminium slats which resist penetration. An internal locking mechanism secures the shutter when down or an additional key system can be installed as an optional extra.

Protect Window Shutters give you total control over your environment as well as blending in with the overall appearance of your home.

"Engineered to Perfection"

Are you a creature of comfort?

Then Smartec is the one for you. Made not only to keep you protected, cool and comfortable, but also in control.

Control over your life and, of course, over Smartec - The newest, smartest window shutters you can get. So put up your feet and just push the button ... your Smartec shutters can and will do all the work for you!

The Smartec shutter system works better,

is more reliable, stronger, securer and has features you won't believe.

Protect announces the brand new Smartec range! Manufactured with the highest quality components, and integrating convenient innovations, Smartec is a truly world class product.

The Smartec shutter comprises of a full strength aluminium construction, anodised to prevent internal corrosion, and is filled with a high density polyurethane core for rigidity and insulation.

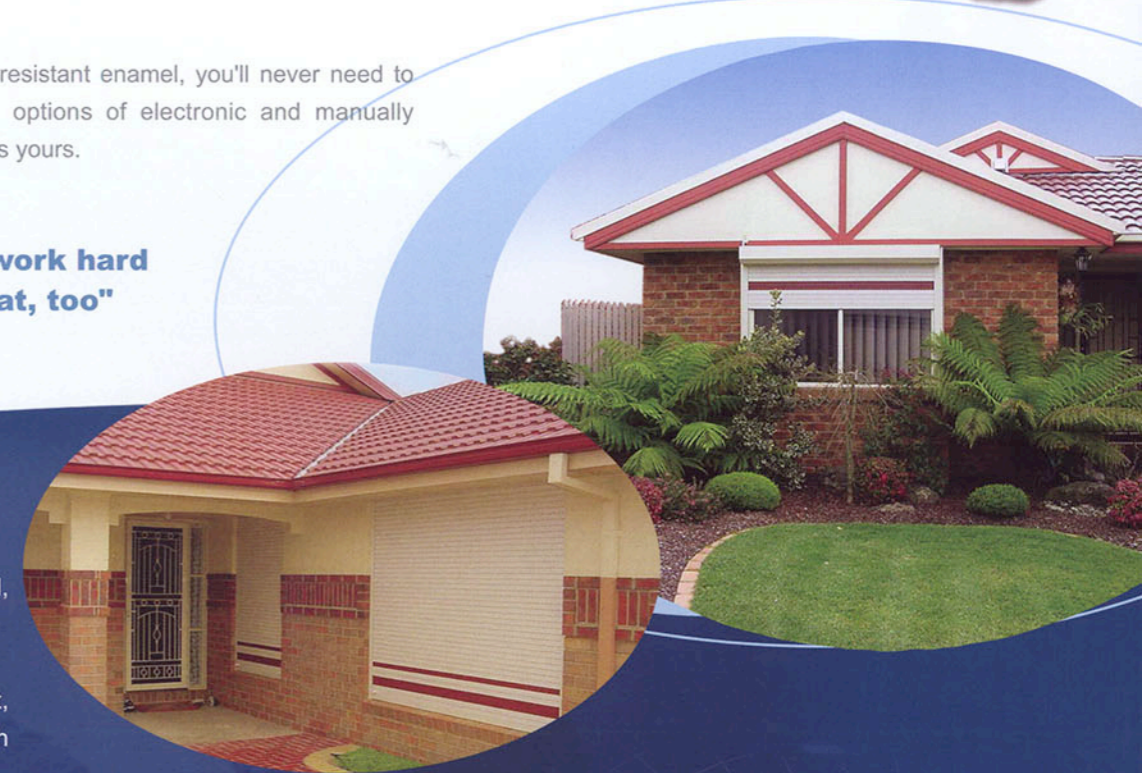

The aluminium construction is prepared and painted in Germany conforming to European standards which far exceed the Australian equivalents. This German design uses an exclusive 2-layered anti-abrasive paint system with a 5 year guarantee.

"All shutters are operated from inside your home for convenience and security"

You can expect easy operation and virtually no maintenance with Protect Window Shutters.

Coated in fade and abrasive resistant enamel, you'll never need to paint a single stroke. With options of electronic and manually operated shutters, the choice is yours.

"Shutters that work hard and look great, too"

Smartec is a new generation of revolutionary, technologically advanced shutters that have now become the preferred choice for security, climate and noise control.

The new shutter system addresses the faults and shortcomings of the existing products and is loaded with lots of interesting features that deliver easier operation, greater reliability and advanced control.
